

European Cloud Simple. Scalable. Safe.

Exoscale represents an autonomous cloud, offering unrestricted data sovereignty, legal compliance, various accountability and transparency certifications, and full autonomy in implementation, thanks to open source technology. Our user-friendly, reliable cloud platform is ideal for cloud-native applications, whilst the highest value is placed on all aspects of data protection.

OUR MISSION

SIMPLE

With Exoscale we aim to deliver services that are easy to understand and easy to use. With the possibility of a very granular billing, a Public API used to automate the infrastructure, a Terraform Provider and CLI available Exoscale stands out. Simplicity is also shown when it comes to benchmark our technical performances.

SCALABLE

Exoscale provides all necessary features to create resilient applications, based on standard technologies. Our measurements show that the availability of the service is above the SLA we promise. The products we deliver allow you to build better applications at scale.

SAFE

Exoscale was developed in Switzerland and is a member of the A1 Telekom Group family since 2017. With Exoscale we deliver a product at European scale. Therefore, we operate under strict data privacy laws, such as GDPR. Please note that Exoscale is also safe in terms of customer relationship: no vendor lock-in!

Trust is the basis for long-term relationships

We believe trust is essential to durable relations, and we aspire to get yours. To do so, we regularly undergo third-party audits to help you meet your compliance obligations. We commit to take a stand for our core values of security and privacy, to be the safe and reliable IaaS partner you are looking for.

COMPLIANCE & CERTIFICATIONS

ISO 27001
Managing information security.

ISO 27017
Certified cloud security.

ISO 27018
Protecting personal data.

GDPR
We strictly enforce GDPR regulations.

HDS
Health Data Hosting

Ö-Cloud Quality Seal
standards issued by EuroCloud Austria.

TISAX
Information security management for the automotive industry.

BSI C5
issued by the Federal Office for Information Security

“ Exoscale is a rock-solid, innovative European Cloud for those who create or run cloud-native software. We are uniquely positioned to address the needs of those who value digital sovereignty, data privacy and open standards.”

DEIN DEAL

RUNS ON
EXOSCALE

DeinDeal is the largest shopping club for furniture and design products in Switzerland. DeinDeal runs on our European Cloud Exoscale.

A SUCCESS STORY:

Why DeinDeal chose Exoscale

- 1 User-friendly**
This IaaS platform offers customers not only a number of central infrastructure components but also flexibly adaptable, easy-to-manage and scalable cloud infrastructure services.
- 2 Attractive Pricing**
Exoscale offers a transparent, needs-based pricing structure.
- 3 Speed and top performance**
Exoscale scores with its speed, which contributes to the excellent price-performance ratio. Coupled with the ease of use and its efficient interfaces, DeinDeal was in production in no time.

Exoscale Datacenter Locations based in Europe

With 7 datacenters located across Europe, application owners can select the best location for their data - without eavesdropping. Operated and serviced by our local team of experts and developers, battle-hardened from experience in highly critical environments and industries ensures your data and services are safe from any technical or legal harm.

GDPR VS CLOUD ACT

! Did you know that the word **Cloud** stands for **Clarifying Lawful Overseas Use of Data** in that context?

The **CLOUD Act** requires companies with **Headquarters in the USA** to grant **US authorities** access to stored data, even if the data is not stored in the USA. In short: **Data hosted by American cloud providers can be accessed, even if the data center is located in Europe.**

AT A GLANCE

- ✓ Flexibility and independence
- ✓ True Pay-per-Use
- ✓ Compliance to many frameworks including GDPR
- ✓ Reliable Support
- ✓ Security
- ✓ Efficient DevOps tool integration like Terraform

Get an overview about the services of Exoscale

The core services that every cloud service provider offers are compute, storage, and networking. Exoscale expanded its services with:

- Block Storage,
- a managed and scalable Kubernetes service (SKS),
- Database as a Service engines like MySQL, PostgreSQL, Redis, Grafana, Apache Kafka, and OpenSearch.

EXOSCALE
member of | A1 Digital

Exoscale, founded in 2011, is a member of A1 Digital and belongs to the Telekom Austria Group. The cloud provider with its headquarters in Switzerland supports businesses and engineers in operating their workloads and applications securely in the cloud. Its user-friendly, reliable and high-performing cloud platform makes Exoscale the ideal partner for cloud-native applications. Our focus on security and data protection also ensures continuously smooth and GDPR-compliant cloud use.
